

RIMEX

Building better wheels

Tire Mounting Solutions

Thick, concentrated RIMEX Tire and Tube Mounting Compound is the fastest, easiest bead seater in the business. Just apply RIMEX Tire and Tube Compound full strength between the bead and the rim and inflate.

RIMEX Tire and Tube Mounting Compound is an affordable way to aid mounting procedures. It can be used for all mounting requirements and excess can even be recovered and re-used. The compound also aids in preventing rust build-up on wheels/rims. It is a soap based, non-toxic and non WHMIS controlled substance.

25 lb pail: PN: MUR-2005-RMX*

Key Features:

- Economical
- Versatile - used for all mounting requirements
- Rust inhibitor - added to help fight rim rust

Dr. Dave's Professional Tire Bead Gel

Dr. Dave's Professional Tire Bead Gel is a light viscosity lubricant with a film strength that ensures tire beads are properly seated. It is a water-free, non-toxic and non WHMIS controlled substance.

Key Features:

- Applies to a wet surface without diluting
- Will not freeze in a cold climate
- Will not evaporate on a hot wheel or in a warm climate

The environmentally friendly (rapidly biodegradable) bead gel can be applied with a brush, roller or a spray-on applicator.

Dr. Dave's does the job and leaves no sticky or greasy residue or material build-up behind on the tire bead.

10 kg pail: PN: DRD-010*

18 kg pail: PN: DRD-018*

181 kg drum: PN: DRD-181*
