Building better wheels

Bead Breakers

Designed to prevent the tool from 'kicking out' and causing injury, RIMEX produces the strongest, safest, most stable Bead Breaker in the industry. RIMEX Bead Breakers will break even the most stubborn earthmover tyre bead. The solid grip and rigidity provided by the custom jaws, breaks the tyre bead from the back section or bead band of the rim without damaging the tyre or rim components.

15 ton Bead Breaker Single Jaw Design

P/N 785-000-0001 (50 lbs)

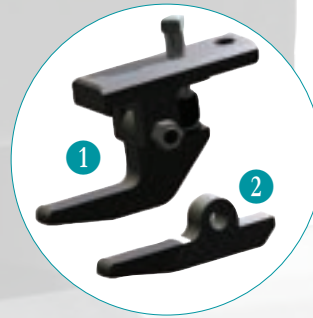

The single hook design breaks the tyre bead from a solid back section or flange without damaging the tyre.

The custom made Universal Jaw, P/N 785-000-0068, contains two removable lower jaws:

- 1 P/N 785-000-0066 *pictured right*
- 2 P/N 785-000-0067 *pictured right*

The Universal Jaw is supplied with each tool and allows the Bead Breakers to be used in numerous wheel applications.

Please refer to the RIMEX 15 ton Bead Breaker Instruction Manual for operation and safety instructions.

Optional Jaws (sold separately)
